About This Game

Salsa Virtual teaches you dancing using virtual reality. Learn the fundamental movements of Salsa, one of the most popular Latin partner dances in the world, including popular building blocks like:

- Forwards and Backwards Basic
- Side to Side Basic
- Cumbia Step
- Back Breaks
- Follower's Underarm Turn
- Cross Body Lead

Never has there been a better way to learn from home. Compare to your local dance studio and you'll realize you will save a ton of time and money (and heartbreak) while starting your new and legendary hobby.

No partner? No problem. Our professional teachers will explain how movements translate from your virtual partner to a real

world experience. Pause. Slow down. Rewind. Practice. With a level dedicated to dance fundamentals, even those of us with two left feet can learn to check our balance, and get used to dancing in VR, so we can eventually do it in the real world.

Title: Salsa-Virtual

English

looks like it should be a room in VRchat not good enough to be its own game. great idea and you can probably learn something from it but the execution is very bad. It's not just the sloppy amateur looking graphics. Even the lessons are painful to sit through because the interface is clunky and lacking features.
